**March 2021**

**Product Rationalization – AMERCOAT® 182 ZPHB phase out**

Dear Valued Customer,

We are writing you to advise you the phase out of *AMERCOAT 182 ZPHB* in the EMEA region.

*AMERCOAT 182 ZPHB* is a two-component high build polyamide zinc phosphate epoxy primer/coating currently in our range. We have other alternatives in our product range and would like to bring your attention towards *SIGMAFAST™ 278*.

*SIGMAFAST 278* offer a number of benefit over *AMERCOAT 182 ZPHB*. Higher solids, shorter minimum overcoating interval, faster drying, wider dry film thickness range. *SIGMAFAST 278* has long track record, is globally available and is certified in various NORSOK and ISO12944 systems.

Should you have questions about the most suitable replacement for *AMERCOAT 182 ZPHB* in your particular field of application, please contact your local technical support or sales representative that will guide you towards the best solution.

The phase out of *AMERCOAT 182 ZPHB* is targeted for September 2021.

If you would like to trial our other solutions prior to this change or discuss any aspect of this in more detail, please do not hesitate to contact your local account manager.

Yours Faithfully
