**Product Rationalization – SIGMAZINC™ 160 phase out**

Dear Valued Customer,

We are writing to advise you of the phase out of SIGMAZINC™ 160.

SIGMAZINC™ 160 is a two-component, moisture-curing inorganic zinc (ethyl) silicate primer. It was decided to rationalize this product for complexity reduction reason. There is a number of suitable other solutions in our PPG PMC product range such as SIGMAZINC™ 158 or DIMETCOTE® 9 that offer the same performance or have even more benefits over SIGMAZINC™ 160 and can be used as a replacement.

Should you have questions about the most suitable replacement for SIGMAZINC™ 160 in your particular field of application, please contact your local technical support or sales representative, who will be more than happy to help you with a tailor made advice.

The phase out of SIGMAZINC™ 160 will be effective from September 2020.

If you would like to trial other of our solutions prior to this change or discuss any aspect of this in more detail, please do not hesitate to contact your local account manager.

Yours Faithfully

A handwritten signature in blue ink, appearing to read 'H. Putter', with a stylized flourish at the end.
