Product Rationalization – STEELGUARD™ 702 phase out

Dear Valued Customer,

We are writing to advise you of the phase out of STEELGUARD™ 702.

STEELGUARD™ 702 is one component, thin-film solvent-borne intumescent coating for fire protection for circular or rectangular hollow section structural steel. PPG has decided to rationalize this product for complexity reduction.

Should you have questions about the most suitable replacement for STEELGUARD™ 702 in your particular field of application, please contact your local technical support or sales representative.

The phase out of STEELGUARD™ 702 will be effective immediately and we will sell out our remaining stock.

If you would like to trial our other solutions prior to this change or discuss any aspect of this in more detail, please do not hesitate to contact your local account manager.

Yours Faithfully
